SERVICE STATISTICS

•*Assignment Backlog Update* — During July the focus was on processing of those assignments received with new patent applications in order to get back on track with our first-in/first-out workflow. The result of this cleanup effort has been several days increase in the time to record patent assignments received from the Mail Room. Over 6,200 new patent application assignments and 2,500 mail room assignments were processed this month. Now both types of work are moving properly through the branch. Currently, information for assignments filed with new patent applications through March 17, 1989, is available to the public. For patent assignments received in the Mail Room, the public information date is April 18, 1989.

During the last several weeks there has been an increase in the number of trademark assignments filed. An average of 242 were received per week this month compared to an average of 197 per week in June. This increase in filings, and our introduction of additional training for conveyance examiners and paralegals on the complexities of trademark assignments, has resulted in some increased processing time for trademark assignment documents.

During this reporting period, a total of 10,281 recorded patent assignments and 1,725 recorded trademark assignments were mailed back to the correspondent. This compares to 6,565 patent assignments and 1,109 trademark assignments in the previous period.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
